EDUCATION

COURSE	SCHOOL/COLLEGE	BOARD	YEAR	MARKS
B.TECH	Maharaja Surajmal Institute of Technology	GGSIU	Present	81.7%
Sr. Secondary	M.D.H International School	CBSE	2014	90.67%
Secondary	M.D.H International School	CBSE	2012	8.4 CGPA

SKILLS

Languages: C, C++, Ruby, Bash, HTML/CSS (Sass), JavaScript, Basic Java

Frameworks: Rails, Angular 4, React, Capybara, RSpec, Bootstrap, jQuery

Databases: SQLite, MySQL, PostgreSQL, Redis, Elasticsearch

Others: Git, Docker, Kibana, Heroku, GitHub, Travis, Surge

EXPERIENCE

- **HackerRank (Software Engineering Intern)** January-Current 2018
Worked on contextual sample tests feature, used google cloud platform as container provider, made the tests run faster on the CI, etc.
- **Coding Ninjas (Angular and Ruby on Rails Developer)** October-December 2017
Worked on the CodeZen and tool application <https://codingninjas.in/>
- **Google Summer of Code with openSUSE (Ruby on Rails Developer)** June-August 2017
Made Travel Support Application useful for more organizations
Implemented the concept of event organiser, developed a feature to send emails to event participants, etc.
Project: <https://github.com/openSUSE/travel-support-program>
Details: <http://blog.nikhilgupta.me/gsoc-final-evaluation/>
- **OFFSTEP (Web Developer – Ruby on Rails)** June-August 2016
Developed new features: Forums, Message Inbox, Detailed Student report and dashboard. <http://www.offstep.com/>
- **Gau Prem Sewa Sanstha (Web Developer)** February-March 2016
Developed a website for the NGO, to manage the donations and user requests. <http://www.gaupremsewa.in/>

PROJECTS

- **Map Vehicles (React, Google API):** Add vehicles with source and destination and watch their travel route and the time taken to reach the destination on google maps. <https://goo.gl/p6yDXt>
- **Capture-API (Ruby on Rails):** API to build application similar to Instagram. Provides methods for user authentication, posting images and following other users. <https://goo.gl/7R8kV6>
- **Benchmarking JavaScript Frameworks (Angular, React):** Project to compare JavaScript frameworks such as React and Angular.
- **Easy History (JavaScript):** Chrome Plugin which lets you create keywords for websites and helps you to browse history with a clean and fast interface. <https://goo.gl/LjX3LE>
- **ReviewIt (Ruby on Rails):** An application for the users to create and share their reviews on products with others. <https://goo.gl/AeuCT8>

ACHIEVEMENTS

- **Event Head of Code Till Dawn Avensis** January 2017
An Online Coding competition hosted on Hackerearth which had more than 500+ participations. The event was also awarded as the *best event*.
- **Hack MAIT:** March 2016
Winner. Developed Jarvis, a ruby on rails application to generate automated bots to perform online tasks for users.
